Aaron Haag

Phone: (929) 428-4573 | Email: aaronm.haag@gmail.com | Danbury, CT
LinkedIn: https://www.linkedin.com/in/aaron-haag/
Portfolio: https://amhaag.github.io/react-portfolio/
GitHub: https://github.com/amhaag

Pragmatic programmer with a love for discovery, not ego. I excel at rapid iteration and lean prototyping; make it, break it then build it. Profession problem solver with curiosity, humility, and a willingness to question assumptions. More interested in finding the answer than having the right answer.

Technical Skills

Python, C#, JavaScript ES6, Git, React, GraphQL, Pandas, MSSQL, Node.js, ASP.NET and C.

Showcase Project

Sudoku Solver | https://github.com/amhaag/sudoku-solver | Deployed on Vercel

Developed a highly efficient recursive algorithm to solve Sudoku puzzles, even with minimal initial clues, employing techniques such as weighted graph traversal and a depth-first approach to identify optimal solutions in scenarios with multiple plausible answers.The web app demonstrates robust error handling with an easy to use User Experience.

Experience

Web and Application Developer **2022-Present**
Elite Casino Resorts **Westport, CT**

- Introduced version control with Git and adapted an inhouse GitHub alternative.
- Created a release pipeline utilizing file hashing and the ability to downgrade versions.
- Eliminated several paper based processes across 6 different casino locations.
- Built an optimized real time data pipeline for live gaming information.
- Designed a robust dashboard for help desk tickets and maintenance requests.

Software Engineer **2022-Present**
Bridgeton Research Group **Westport, CT**

- Spearheaded the development of a comprehensive data validation module, ensuring precise and up-to-date market projections, resulting in enhanced accuracy and reliability.
- Designed and implemented a Python-based GUI application empowering research engineers to efficiently visualize and prototype market models, significantly accelerating their workflow.
- Engineered a groundbreaking asynchronous and non-blocking data ingest system, resulting in a remarkable 700% reduction in runtime, optimizing operational efficiency and overall productivity.

Additional experience on the following page.

Experience continued

Invoice Analyst and Systems Lead **2017-2022**
Starr Companies **New York, NY**

- Seamlessly managed a robust RDBMS handling annual billing exceeding one billion dollars, showcasing expertise in data management and ensuring detailed error handling.
- Leveraged a strong programming mindset to use Visual Basic to automate Excel tasks, increasing productivity within financial analysis and reporting.
- Strategically designed and implemented an efficient file management schema, enabling seamless collaboration and streamlined file sharing across multiple teams, promoting enhanced productivity and effective communication.

Epic Software *2015-2016*
Accounting Assistant **Madison, WI**

- Leveraged SQL database expertise to develop a scalable and efficient system for calculating billable hours across a network of 200+ hospitals, demonstrating proficiency in data management and manipulation, key aspects of software development.
- Designed and implemented innovative logic algorithms to identify and filter mislabeled billable time, significantly enhancing accuracy in charges and optimizing financial processes, highlighting problem-solving abilities and attention to detail.

Education

Full Stack Web Development Bootcamp **September 2022**
The University of Connecticut **Danbury, CT**

- Studied CSS, HTML and Javascript with a focus on ES6 features.
- Utilized the MERN stack (MongoDB, Express, React and Node.js) to build team projects.
- Expanded my knowledge of MySQL and made use of the Sequelize.js ORM
- Additional topics covered were Git, PWAs, REST APIs, GraphQL and TDD
